

AI Essentials FOR Educators

DISCOVER WHAT AI CAN DO FOR YOU

Join us for short, engaging sessions that demystify AI and give you tools you can use right away in your work.

**SEP
23**

AI Basics

Understand the core concepts of AI, see real classroom examples, and leave with practical ideas for responsible use in your role.

**OCT
21**

Prompting with AI

Learn how to craft powerful prompts that save you time, improve results, and boost productivity across everyday tasks.

**NOV
18**

Brisk in the Classroom

Discover how Brisk can streamline lesson planning, grading, and differentiation—freeing you up to focus on teaching.

**DEC
16**

AI Sandbox

Bring your projects and questions to an open lab space where you can explore tools, experiment together, and get hands-on support.

**JAN
20**

Notebook LM

Use AI to organize resources, summarize complex materials, and design more effective units and lessons with less effort.

**FEB
17**

AI in Unit Design

Gain step-by-step strategies for weaving AI into curriculum design—aligning with standards while encouraging creativity.

**MAR
3**

AI & Creativity Tools

Experiment with media tools that help students create visuals, videos, and projects that showcase learning in new and engaging ways.
